# Base Camp

View of a building at the Atacama Desert Center -  
The camp is run by the Pontificia Universidad  
Católica de Chile.

# Research Project

The rugged beauty of the Atacama Desert - a unique environment for the research project of the UNESCO Chair [for Earth Observation and Geocommunication] in Heidelberg.

# Camanchaca

Fog: the use of this natural water resource in the world's driest desert is the focus of research interest.

# Rootless Plant Tillandsia

A plant that uses water from the fog, is the subject of intensive research in the Atacama Desert
